ABOUT ME

An ambitious IT professional with robust skills in Network Administration and Security, ensuring reliable connectivity, efficient system configuration, and strong protection against cyber threats. My innovative expertise in web development enables to design and maintain responsive, functional and user-friendly websites. I apply creative proficiency in Graphic designing to produce visually appealing digital content that effectively communicate ideas and brand identity. With dependable experience in user support and hardware maintenance, I efficiently troubleshoot technical issues, maintain systems and provide timely assistance to users. Additionally, my intuitive skills in UI/UX design allow me to craft engaging, accessible and seamless digital experience that enhances user satisfaction.
